Preface

This volume contains selected papers of the first international conference on Logical Aspects of Computational Linguistics, held in Nancy, France, from April 23 to 25, 1996.¹ A general introduction by some members of the committee explains the relevance of developing a conference on this topic, situates the papers, and provides an account of the discussions, namely, *New syntaxes for linguistic theories*, *Logical aspects of the minimalist program* and *Logical semantics*.

The volume contains eighteen selected papers and four invited papers. There were forty four submissions, their overall quality was high, and selection was difficult. The Programme Committee is very grateful to everyone who submitted a paper and to all the referees listed overleaf for their essential assistance and generously given time. Let us also thank the participants for the pleasant and stimulating atmosphere during the meeting.

The Committee is especially grateful to the invited speakers, namely, Jean-Yves GIRARD,² Aravind K. JOSHI, Marcus KRACHT, Dale MILLER and Edward STABLER (respectively from Marseilles, Philadelphia, Berlin, Philadelphia and Los Angeles). Indeed, not only did they accept our invitation and give their lectures, but they also substantially contributed to the conference, in particular to the discussions.

Finally we wish to thank the two institutions under one roof that co-organized this event, namely INRIA-Lorraine and CRIN-C.N.R.S., as well as the sponsors of this event: *France-Télécom CNET*, *Rank-Xerox Research Center*, *l'Institut National Polytechnique de Lorraine*, *l'Université Henri Poincaré*, *La Région Lorraine*, *La Communauté Urbaine du Grand Nancy*.

More personally, I wish to thank the members of the Programme Committee and the Organizing Committee, listed overleaf, for their hard work and support, as well as Roger Hindley, Claude Kirchner and Pierre Lescanne who gave me precious advice, not to forget my research project without whom nothing would have happen, CALLIGRAMME.³

Nancy, July 1997

Christian Retoré

¹ The idea of this conference germinated during a workshop we organized in september 1995 on the same topic, whose selected papers are to be published in the January 1998 issue of the *Journal of Logic, Language and Information*.

² His contribution, *Introduction to linear logic* is not included in this volume, but Jean-Yves Girard recently published an introduction to linear logic: *Linear logic: its syntax and semantics*. In J.-Y. Girard, Y. Lafont and L. Regnier (Eds.) *Advances in Linear Logic*, volume 222 of *London Mathematical Society Lecture Notes*. Cambridge University Press, 1995. pp. 1–42

³ CALLIGRAMME, *Logique linéaire, réseaux de démonstration et grammaires catégorielles* (INRIA-Lorraine & CRIN-C.N.R.S.): D. Bechet, Ph. de Groote, F. Lamarche, A. Lecomte, S. Malecki, J.-Y. Marion, G. Perrier, N. Pierre (secretary), C. Retoré.

Programme Committee

V. Michele Abrusci	Università di Roma tre
Patrick Blackburn	Universität des Saarlandes, Saarbrücken
Marc Dymetman	Rank-Xerox Research Center, Grenoble
Mark Johnson	Brown University , Providence
Alain Lecomte	Université Grenoble 2 & INRIA-Lorraine
Michael Moortgat	OTS, Universiteit Utrecht
Glyn V. Morrill	Universitat Politècnica de Catalunya, Barcelona
Aarne Ranta	Helsingin Yliopisto
Christian Retoré (Chair)	INRIA-Lorraine & CRIN-CNRS, Nancy
Eric Villemonte de la Clergerie	INRIA-Rocquencourt

Additional Reviewers

José L. Balcázar	François Lamarche
François Barthélémy	Bernard Lang
Kalyan Basu	Denis Lugiez
Denis Bechet	Sophie Malecki
Francine Blanchet-Sadri	Richard Oehrle
Joachim Gabarró	Guy Perrier
Bertrand Gaiffe	Anne Reboul
Philippe de Groote	Laurent Romary
Herman Hendriks	Michael Rusinovitch
Miki Hermann	Klaus Schulz
Barbara Heyd	Pascale Sébillot
Hélène Kirchner	

Organizing Committee

Denis Bechet, Anne-Lise Charbonnier, Philippe de Groote,
François Lamarche, Bernard Lang *, Guy Perrier, Nathalie Pierre,
Christian Retoré (Chair), Armelle Savary
INRIA-Lorraine & CRIN-CNRS, Nancy — * : INRIA, Rocquencourt

Table of Contents

Logical Aspects of Computational Linguistics: an introduction <i>Patrick Blackburn, Marc Dymetman, Alain Lecomte, Arne Ranta, Christian Retoré, and Eric Villemonte de la Clergerie</i>	1
 Invited papers	
Partial proof trees, resource sensitive logics, and syntactic constraints <i>Aravind K. Joshi and Seth Kulick</i>	21
Inessential features <i>Marcus Kracht</i>	43
Linear logic as logic programming: an abstract <i>Dale Miller</i>	63
Derivational minimalism <i>Edward Stabler</i>	68
 Selected papers	
Tree adjoining grammars in non-commutative linear logic <i>V. Michele Abrusci, Christophe Fouqueré and Jacqueline Vauzeilles</i>	96
Constructing different phonological bracketings from a proof net <i>Denis Bechet and Philippe de Groote</i>	118
Vagueness and type theory <i>Pascal Boldini</i>	134
A natural language explanation for formal proofs <i>Yann Coscoy</i>	149
Models for polymorphic Lambek calculus <i>Martin Emms</i>	168
Sloppy identity <i>Claire Gardent</i>	188
A family of decidable feature logics which support HPSG-style set and list construction <i>Stephen J. Hegner</i>	208
Language understanding: a procedural perspective <i>Ruth Kempson, Wilfried Meyer Viol and Dov Gabbay</i>	228

VIII Table of Contents

The automatic deduction of classificatory systems from linguistic theories	
<i>Paul John King and Kiril Ivanov Simov</i>	248
A belief-centered treatment of pragmatic presupposition	
<i>Lucia H. B. Manara and Anne de Roeck</i>	274
Connected sets of types and categorial consequence	
<i>Jacek Marciniec</i>	292
Generation as deduction on labelled proof nets	
<i>Josep M. Merenciano and Glyn V. Morrill</i>	310
Semilinearity as a syntactic invariant	
<i>Jens Michaelis and Marcus Kracht</i>	329
Quantitative constraint logic programming for weighted grammar applications	
<i>Stefan Riezler</i>	346
Strict LT2: regular :: Local: recognizable	
<i>James Rogers</i>	366
Pomset logic and variants in natural languages	
<i>Irene Schena</i>	386
Constraint logic programming for computational linguistics	
<i>Frieder Stolzenburg, Stephan Höhne, Ulrich Koch and Martin Volk</i>	406
Representation theorems for residuated groupoids	
<i>Marek Szczerba</i>	426
Author Index	435
